Step Two: Build Website

Bm   GM7
Lord, I have this music
      A7   Bm
So, what do I do now?
GM7   Em
Some I got to sing in church;
E7   A7
The rest just gathers dust.
Bm   GM7
If this is gonna spread Your word,
Em   Am9   Bm
If any of it's good at all,
  GM7   Em
If I could only be a voice
        E7   A7
And give it to the world….

        D
Go build a web-site
      G   D
You heard what I said
         D
Go build a web-site
         E7   A7
Go put your stuff on the web!
      D   D7
Don't leave that stack of music
G   E7
Up on the shelf
        D
Go build a web-site
      G   A7 D
And you build it your-self.
(myself?) D - G - A7

      D
Hey where do I start?
      G   D
Now what do I do?
   D
Do I go dot com, dot org
    E   A7
Or maybe… dot who?
        D   G E7
What's http or html?
   D
I know I found a webhost
         G   A7   D
who came straightway from….
(You know that rhyme.
I switched from that one anyway) D – G- A7

I built a web-site

I did what you said.
I built a web-site;
Put my stuff on the web.
I got my music
Down from the shelf
I built a web-site
And I built it myself.
(Well…mostly, anyway)

            G   Em
There were all of those calls to
A   Bm
Friends and to techs.
G   Em
All those days staring at
A   Bm
"Error" messages
G   Em
'Tested links and tried to think
     A   Bm
My way through this maze.
    E7
O Lord, it's clear You work
              A7
In most mysterious ways!

I built a web-site
I did what you said
My music's out there
I put it out on the web.
I got my music
Down from the shelf
I built a web-site
And I did it myself
         G – Em - A7 - Bm
(I added mp3's and a tracker
        G Em A7 Bm
and I'm learning ftp….
E7   A7
Man, the learning curve…)

I built a web-site
I did what you said
My music's out there
I put it out on the web.
I got my music
Down from the shelf
I built a web-site
And I did it myself
I built a web-site
And I built it….
(with just a little bit of help)
